

Universal Cup

BLULABS UNIVERSAL CUP

Blulab's **Solution**

In a process that spanned 24 months, Blulabs engineered the **ideal universal cup for the airline industry:**

- Lab tested & field tested in continental and intercontinental flights
- Tested across the complete inflight menu including heat, alcohol & ice
- EU SUPD compliant
- Certified home & industrial compostable, biodegradable, recyclable, forestry and Flustix plastic-free certified
- Stackability: 47 per sleeve, 423 cups per drawer
- Currently in mass production and delivering

**Flustix
Plastic-Free**

**Commercially
Compostable**

**Home Compostable
Certified**

Certified Recyclable

**Program for the Endorsement
of Forest Certification
FSC Equivalent**

**No Intentional
PFAS Added**

SINGLE USE PLASTIC COMPLIANCE

Blulabs' Paper Cups are **SUPD compliant** with Flustix plastic-free certification, meeting EU and EEA regulations without requiring the “Dead Turtle Logo.”

Greenberg Traurig confirmed our compliance with SUPD, ensuring no synthetic polymers as structural components.

Our Paper Cups meet regulations in these key regions:

- **Canada**
- **India**
- **Maharashtra**
- **Hong Kong**
- **France**

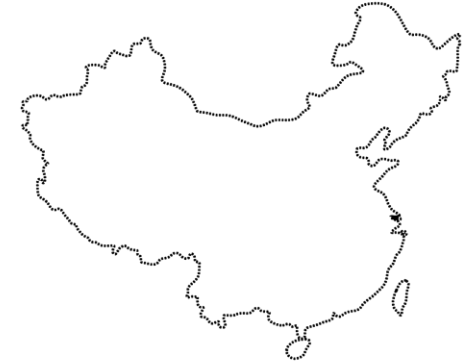

MASS PRODUCTION OF THE CUP

- Current mass production in China and Mexico and the ability to expand to Vietnam and Indonesia based on demand
 - Current available production capacity: 6 containers per day
 - Available expansion capacity: 9 containers per day additional
- 600 containers already produced
- 800 containers of total production by Chinese New Years (Feb 2025)

Mexico

China

Vietnam

Indonesia

Thank You

From everyone on the Blulabs team, we appreciate the opportunity to partner with you and look forward to helping you reach your sustainability goals!
